

FAQ

Backup

Бекап всех файлов домашней директории делается раз в неделю вночь с субботы на воскресенье. Найти сохраненные файлы можно перейдя в директорию

```
/home/backups/<backup_data>/<first_letter_your_account>/<you_account>
```

Например,

```
cd /home/backups/2021-10-24_03:00:01/i/iofa
```

LaTeX

При использовании русского, PDF файл генерится в неправильной кодировке. Для исправления ситуации надоиспользовать пакет **cmap**:

```
\documentclass[a4paper,11pt]{article}
\usepackage{cmap}
%\usepackage[utf8]{inputenc}
\usepackage[english,russian]{babel}
%\usepackage{graphicx}
%\usepackage{url}
%\usepackage{xcolor}
%\usepackage{ulem}
```

```
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
```

```
\begin{document}
```

```
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
```

Это русский.

This is English.

PDF генерится в правильной кодировке (UTF8, пакет cmap)

```
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
```

```
\end{document}
```

```
%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%%
```

git repos

More details see [Git за полчаса](#)

- Clone repo to the local computer:

```
git clone git@theory.sinp.msu.ru:repo
```

- Prepare new file(s) for commit:

```
git add file1 file2 ...  
git add -A (for all files)
```

- Commit file(s):

```
git commit file1 file2 ...  
git commit -A (for all files)
```

- Push changes to repo:

```
git push
```
